## EFP Probe

### Putting Classification and Guidelines into Practice.

The **EFP Probe facilitates rapid screening and detailed periodontal diagnosis**. Enabling clinicians to seamlessly implement **state-of-the-art periodontal diagnosis and treatment decision making** into clinical practice. It can be used in all steps of **periodontal and peri-implant therapy**.

Learn more at:  
[HuFriedyGroup.eu/EFP-Probe](http://HuFriedyGroup.eu/EFP-Probe)

Developed in partnership with the  
European Federation of Periodontology

**A special band between 4-6 mm** highlighting the key 'critical probing depths' for non-surgical and surgical interventions

**Detailed markings in 1 mm increments** for patients with more severe disease

**Ball-point tip** makes it easier to enter the periodontal pocket without damaging the sulcus and allows to check for plaque-retentive factors

**A special marking at 3 mm** to indicate the absence of pockets

**The calibrated markings**, based on the 2018 EFP/AAP classification and EFP S3-level guidelines, enhance clarity, consistency, and confidence in clinical decision-making

### Piezo Scaling Tips HU-FRIEDY

**Why Piezo?** The smooth linear movement generated by piezoelectric systems creates a stroke pattern that is similar to hand instrumentation. Adapting the lateral surface of the piezo tip against the tooth surface (similar to a hand instrument) will increase clinical efficiency.

**S-Series Tips** Compatible with Satelec/Acteon® and NSK® devices\*

**E-Series Tips** Compatible with EMS® handpieces\*
